# OPTIMIZATION AND MAINTENANCE

Kurt Lindner  
August 2019

Our mobile team of specialists can compensate for your personnel shortfall on site. This allows you to perform optimization, amendments, maintenance works or repairs smoothly without interrupting the production cycle.

# # 01

## AMENDMENT AND OPTIMIZATION

### SERVICES

Accurate scheduling and coordination with the areas involved allows us to perform amendments on series tools and hemming dies on site and at short notice.

# ANALYSE

## SERVICES

We analyze the scope of amendment using the CMM report, component, or assembly. We then determine the activity required for each tool operation on that basis.

# # 02

# # 03

## MODIFICATION/IMPLEMENTATION

### SERVICES

Our services include incorporating tool corrections and revising outer skin dies to improve your audit grade (side panels, doors, tailgates).

# TRYOUT

## SERVICES

We work in the tools on tryout and series presses – of course planning precisely in your time frame.

# # 04

# # 05

## BLANK OPTIMIZATION AND APPROVAL

### SERVICES

Our blank optimization work includes analyzing tools and production parameters. To do this, we conduct experiments for dimensional accuracy, surface quality, and process assurance. We draw up catalogs of activities and documentation, and determine potential savings.

## BUY OFF

### SERVICES

We get tools ready for approval by means of customer requirements. Once we've assessed customer-specific parameters, we conduct approvals according to specifications or customer regulations. We draw up activities and documentation for support in achieving goals.

# # 06

# RESULT: SATISFACTION

Kurt Lindner  
August 2019

Because anything else is not enough for us.  
You and your clients have high standards, and  
we deliver high quality.
